Range Servant

– Established in 1983

Range Servant was founded in 1983, in Halmstad by Jordan Knez. He took his golfing enthusiasm and combined it with his technical knowledge from the packaging industry. The result was the first Range Servant Ball Dispenser and since then he has developed many high quality golf range products.

After more than twentyfive years in business Range Servant has obtained recognition for its high quality products with strong reliability and excellent customer service through experience and technical knowledge. Range Servant missions statement states: "The bond we have with our customers is deeply important to us. We continuously work to drive our design and product development engine, so that we always can meet our customers needs. With help from our customers we receive valuable feedback from testing our new products, so that we can ensure that we only deliver products with the highest possible quality and reliability. Construction materials and assembly components are tested thoroughly. Our goal is always to deliver a product that is not only innovative, but ingeniously simple and ready to perform at highest level."

With long experience in the golf industry, Range Servant has successfully expanded its market shares and is today the leading supplier of high quality ball management systems. In 1991 Range Servant opened a subsidiary company in North America and is also represented by distributors all over the world. A subsidiary office is also located in Great Britain. Range Servant is an active participant in the golf community and member of several industry organizations.

PUT THE GOLF BALL IN PLACE

It is at the driving range the foundation for success is laid. Rational training combined with professional support leads to better golfers. A good golf driving range offers the best preconditions for all golfers, both during the training session and as a warm-up for that regular game with friends. To quickly receive a basket of good clean range balls, take a few steps to the range mat or walk up to an automatic Tee-Up and start swinging the golf club, that is the way a good driving range should work. When golfers, through efficient training achieves success, the interest increases and more golfers will find their way to the driving range to improve their game, which leads to a higher turn-over for you as a driving range operator.

Develop an efficient golf range with Range Servant

With our Ball Management System concept, every range operator is able to develop a cost efficient and easy-to-operate driving range. Through automation of the driving range and through sophisticated IT-Solutions a Ball Management System releases both time and resources to improve core business and customer relations.

Comprehending the specific requirements for designing and operating a golf range, we are able to customize our Ball Management System to suit both the small country club and the large commercial range. We provide solutions that improve your range operations today and prepare you for the future. We have developed four technologies to help create an efficient Ball Management System for your range:

- Ditch System
- Blower System
- Multi-Storey
- IT-Solutions

BALL MANAGEMENT SYSTEM

- Drive unit MOP 1
- Ball picker with hydraulic emptying 2
- Ball ditch 3
- Ditch elevator 4
- Ball washer 5
- Blower 6
- Hose for the blower system 7
- Hopper 8
- Blower manifold 9
- Tee-Up 10
- Ball dispenser 11
- Tee mat 12

Ditch System

Our ball ditch system eliminates the manual lifting of balls into a washer. Using our unique MOP drive unit and ball picker with hydraulic baskets, balls are emptied in the ball ditch at the touch of a button. Filled with water, the ball ditch acts as a soaker tank, holding approximately 5 000 balls. The ball ditch is a time saver, allowing your staff to continue picking balls while the ditch system washes and transports the balls to the dispensers.

Multi-Storey

One of our technologies is our multi-storey elevator, which is able to load multiple dispensers on multi-storey ranges. We are able to custom make elevators to suit your building. In Hong Kong we installed fully automated system with a 12 meter tall elevator, which feeds four dispensers on four floors with range balls.

IT-Solutions

Our Ball Management System concept is not just about "moving balls", but also to provide retail information to all parts of the range business such as the pro-shop, bar or restaurant through IT-solutions. View how your range is operating in real-time sitting anywhere!

Blower System

A blower system makes it possible to feed balls to dispensers in the center of the tee-line from a remote washing area or as a ball distributor feeding balls to multiple dispensers from a central storage area. Using a blower system allows safe and easy access for the range staff and enables easier design of the range area.

The blower system uses compressed air to move the balls in flexible hoses, and can be installed both at single and multi-storey ranges.

TRACK TEE
EVOLVING THE RANGE

Introducing the first
smart tee divider

Track Tee

TrackTee is a revolutionary driving range bay divider that was designed to increase customer satisfaction and driving range revenue. It accomplishes this by using Doppler radar technology to track and display the distance and speed of each ball in an easy to understand format. This gives golfers instant feedback of the results of each swing and creates a new interactive experience that golfers enjoy. It also provides a new revenue potential through advertising on the printable ad panels!

AS SEEN ON TV - NOW ON THE RANGE!

pro tracer
range

Protracer's advanced tracking sensor and software technology captures all shots that are hit on a driving range and provides the golfer with instant and accurate ball flight data. A single system covers up to 20 bays and golfers can use any wifi enabled device (smartphone or tablet) to get tracking statistics, to enjoy games and to take part in competitions.

Introducing Ball tracking, Games & Competition to the Driving Range experience

TRACKING INFO

- Shot Shape
- Carry Distance
- Total Distance
- Distance from Target
- Ball Speed

GAMES

- Closest to Pin
- Longest Drive
- Points Game
- Play Golf Course

ADDITIONAL

- Player Report
- Join Competition
- Leaderboards

Enhance the Range Experience

Our mission at Protracer is to enhance the golfing experience. Protracer Range is designed to fulfill that mission. Our technology will assist Range Owners in making their facility more appealing and at the same time makes the Driving Range experience more exciting for the golfer.

Protracer Range brings Ball Tracking to all golfers!

HOW IT WORKS

Protracer Range is a fixed installation that features two tracking sensors that are placed approximately 30 meters (100 feet) apart. The system accurately pinpoints each shot that is hit in between the tracking sensors and delivers ball flight data back to the player via a smartphone, tablet or a monitor provided by the range.

SHOWREEL TV

Protracer Range Showreel software makes all shots that are hit on the range appear live on a Big Screen TV. The showreel is also designed to show leaderboards of ongoing games and competitions.

ONE SYSTEM - 20 BAYS

One system can handle 10 hitting bays in a row and two floors simultaneously. This means that one system can handle up to 20 hitting bays without any additional hardware.

A SINGLE
SYSTEM
COVERS
UP TO **20**
BAYS

NEW REVENUE SOURCE FOR RANGE OWNERS

Protracer Range creates an opportunity to increase revenue. It gives range owners a new revenue stream while improving the range experience for the golfer.

- New revenue source
- Makes your facility stand out
- Attractive ad space

To ensure the highest performance and reliability of our ball management systems, we work according to our project model, which runs through our entire working process from quotation, design, production to the completed installation. Each project step has to pass through a grid criteria and be approved prior to proceeding to the next step in the project. Using this method we ensure that our customers are involved in each step and receives a system that fulfills their requirements.

to our support line.

Range Servant is a Top Golf partner providing a complete Ball Management System to Top Golf sites around the world.

The balls are extracted from the Top Golf targets using a Range Servant's mobile blower system to the back of a buggy cart.

Peter Allport, Chief Executive Officer, GEI Ltd.

RS Ball Dispenser Flat Top Models

RS-4, RS-8, RS-11, GL6, GL8, GL10

The flagship product of Range Servant is the original RS Ball Dispenser, which has proven to be the most reliable and durable in the market. The grid and cradle system, introduced in 1983, consistently delivers an exact amount of clean, counted and undamaged balls to the customer.

- 3 bucket sizes available
- Exact ball count per dispense
- Tokens, cash, cards, keys
- Stainless aluminium, galvanized
- Easy and safe to load

Since all Range Servant dispensers are modular by design, they can be expanded and upgraded to larger models or into cone top models, to meet the needs of a growing driving range. For example, an RS-8 can be expanded to an RS-12!

Strongly made and simple to maintain, all essential working parts are made in rust resistant galvanized steel and aluminium. An ingenious "grid and cradle" design sorts out damaged balls and other unwanted objects ensuring that the golfer only receives clean and undamaged balls.

GREEN LINE DISPENSERS

With the same durable and reliable dispensing mechanism, Range Servant also offers the Green Line – a powder-coated aluminium ball dispenser with an attractive green housing.

The Green Line dispensers are designed to fit smaller driving ranges and country clubs with a lower ball demand. With its' green aesthetics it looks right at home on the golf course.

RS: FLAT TOP AND GREEN LINE

150 010	RS-4	with internal wash	~ 5 200 balls	1010x550x1476 mm
180 000	RS-8	with internal wash	~ 8 000 balls	1010x760x1476 mm
110 007	RS-11	with internal wash	~ 11 000 balls	1250x1010x1476 mm
GLD 0000	GL 6		~ 5 700 balls	1012x550x1476 mm
GLD 0001	GL 8		~ 8 000 balls	1012x760x1476 mm
GLD 0002	GL 10		~ 10 000 balls	1260x760x1476 mm

Ultima Ball Dispenser Flat Top Models

Ultima 8, Ultima 15, Ultima 16 Dual

Featuring a “single ball” dispensing mechanism that counts the balls individually, you can count on the Ultima to dispense the right amount of balls every time! Combine this with superior electronic controls and the widest selection of payment methods and you have the most flexible and reliable ball dispenser today.

- 3 bucket sizes of any ball count
- Ball count changes easily made
- Photo-sensor counts each ball
- Tokens, cash and cards
- Stainless galvanized aluminium
- Easy and safe to load

All Range Servant Flat Top machines can be loaded from the front or back. Ball counts can be changed at any time by simply turning a dial. Since our ball dispensers are modular, they can be expanded and upgraded to larger models, or into cone top models to meet the need of a growing driving range. For example, an Ultima 8 can be expanded to an Ultima 12!

Range Servant Ball Dispensers will increase ball sales, give you better cash control and reduce labour.

Ultima Cone Top Models

Ultima 12, Ultima 19, Ultima 20 Dual, Ultima 45 Dual

HIGH-VOLUME RANGE?

If you think your range is busy, then look no further! The high volume cone-top models are designed to minimize labour and increase revenue at the same time. These models are extremely versatile and designed to be loaded with any of our renowned automation products. Whether filled by our elevator or blower, our Ball Management Systems are quiet, cost effective and space efficient.

Cone Top models are available in a single or dual outlet design. With capacities ranging from 12 000 to 43 000 our dispensers can meet the demand of any golf range.

Range Servant dual dispensers have proven their mettle at the busiest ranges in the world. With extra capacity and twice the reliability, our dual outlet dispensers will allow you peace of mind.

Quiet, cost effective and space efficient. Our dual outlet cone top models are available in two sizes: 20 000 and 43 000 ball capacity.

These dispensers should be used as a complete Ball Management System together with elevator/blower and ball washer.

ULTIMA: CONE TOP

DNM 0008	Ultima 45 with touch screen	~ 43 000 balls	2022x1520x2056 mm

Ultima Combi

ULTIMA COMBI

The ALL-IN-ONE Ball Dispenser with internal washer and ball elevator.

The Ultima Combi is space efficient and cost effective. This dispenser holds a capacity of 14 000 balls, which makes it the perfect fit for smaller stand alone or club ranges. The internal ball washer and elevator reduce labour to a single step and it is designed to be easily accessed and maintained.

Just like Range Servant's other user friendly ball dispensers the Ultima Combi gives the paying customer the exact amount golf balls, quickly and quietly. The dispensing cycle is easy on your ball inventory. Any payment system can be used and the amount of balls per payment is easily changed.

ULTIMA COMBI

GBM 0000 Ultima Combi with washing capacity 12 000 balls/h ~ 14 000 balls 1010x1010x2165 mm

RS Tee-Up

TEE-UP YOUR CUSTOMERS AND YOUR BALL SALES WITH RANGE SERVANT'S TEE-UPS

The RS Tee-Up with feeder is a unique product that will, at once, increase ball sales while enhancing the customer's golfing experience. Proven to speed up play by 25-50%, golfers benefit from hitting ball after ball without re-gripping or bending down to tee up the next ball, while range owners will notice the increased speed in which golfers finish their buckets. Its ergonomic design allows the golfer to quickly and easily adjust the tee to the perfect height by pressing the up and down button next to the screen.

THE RS TEE-UP

Easy to install, our RS Tee-Up can be placed right on your existing tee-line. It comes standard with the 100 ball capacity feeder hopper and requires only a standard power outlet.

View a video
of the Tee-Up.

*The user friendly Display
Screen accurately shows
the Tee-Height and also
keeps a tally of balls hit.*

THE RS TEE-UP FLUSH MOUNT

In addition to offering all of the standard features, our Flush Mount System can be customized to fit right into your existing tee-line or new range project. The tee-up's mechanics are underneath the platform with the stance mat area laying flush to the tee-line surface. This creates a golf-friendly platform not only for the serious and recreational golfer, but for senior citizens and golfers with disabilities as well.

RS TEE-UP

TJM 0400	Tee-Up with feeder, semi-automatic	~ 100 balls	1640x2222x1000 mm
TMM 0029	Tee-Up with feeder, semi-automatic, flush mount	~ 100 balls	customized area

Ball Picker Light

Range Servant Light pickers are built stronger than any picker in their class. We use only thick gauge aluminium and galvanised steel to ensure that our pickers will stand up to busy ranges and tough terrain. Range Servant pickers have the highest capacities in the market. Our 3 gang pickers hold more than most 5 gang pickers. The Light Picker is available in 2, 3, 4, 5, and 6 gang configurations.

The hybrid design sets the picker gangs in a straight beam configuration. The modified front beam wheel extension, however, reduces the swing weight of the picker when it's attached by our A-Frame to a utility cart.

Both the flat aluminium cross beam and the front beam wheel extension allow for a terrain flexible ride.

- Fully rust-resistant aluminium and steel
- In-line design allows for backing
- Light weight flexible design
- No failure-prone elbow fittings
- Flotation tyres for smooth stable ride
- Multiple flex-points for varied terrain
- Adaptable to any cart or vehicle
- Unique Multiflex discs

View a video of the Picker.

Ball Picker Light is dedicated to be operated with power driven vehicles. One basket hold 400 balls which gives the Light picker a capacity ranging from 1 600 to 4 800 balls. The A-frame is included.

Using the same technology as our larger pickers, the Manual Picker allows for easy and effective picking of smaller practice areas. It can also be used in confined areas when wet conditions make motorized picking unwise.

PICKER DISC MULTIFLEX

MULTIFLEX DISCS

PDM 0052	2 gang	Multiflex	4 baskets
PDM 0000	3 gang	Multiflex	6 baskets
PDM 0082	4 gang	Multiflex	8 baskets
PDM 0085	5 gang	Multiflex	10 baskets
PDM 0086	6 gang	Multiflex	12 baskets

PLASTIC DISCS

PEM 0001	Manual Picker	Plastic	1 basket
310 035	Manual Picker	Plastic	2 baskets

Ball Picker Heavy Duty

Range Servant Heavy Duty pickers are the only pickers truly designed to handle the exploitation at busy stand-alone driving ranges. Since our HD pickers are built to last with thick galvanized steel, they can manage heavy usage as well as rough climates and extreme weather conditions. Our pickers have the highest capacities available in the market today.

- Fully galvanised high grade steel
- In-line design allows for backing
- High capacities – 2 400, 4 000, 5 600 balls
- Greasable pillow block bearings and caster fittings
- Floatation tires for smooth stable ride
- Adaptable to any cart or vehicle
- Multiple flex points for varied terrain

Each gang has two 400 ball baskets for maximum picking capacity. Its straight beam design provides the cleanest sweep in the industry during both straight runs and turns.

IT'S IN THE DISC!

RS Multiflex discs are made of highly resilient soft plastic. The unique design protected discs are both flexible and durable and can absorb daily punishment while picking golf balls under even the most extreme conditions. They are UV protected for maximum wear.

View a video of the Picker.

MULTIFLEX DISCS

310 005	MIDI	3 gang	6 baskets	2 400 capacity
310 015	MAXI	5 gang	10 baskets	4 000 capacity
310 025	JUMBO	7 gang	14 baskets	5 600 capacity

RUBBER DISCS

300 000	MIDI	3 gang	6 baskets	2 400 capacity
300 010	MAXI	5 gang	10 baskets	4 000 capacity

Modular in design, the picker can be upgraded to a larger model with a simple extension kit.

MOTORIZED UNIT MOP AND BALL PICKER

Range servant supplies an easy-to-operate motorized unit specifically designed to work with the Ball Picker, since the elegant but robust unit rests on one steering wheel, it boasts a very small turning radius. Because of its low weight, it is easy on the turf it works on.

The driver cabin is comfortable and sightlines are excellent through the large front window. The combination of strong nylon mesh and net doors on both sides, makes it safe for the operator to use the Ball Picker while the range is in use.

Ball Washer

BT-Series

View a video of
the Ball Washer.

Range Servant BT Ball Washers are famous worldwide for being one of the most reliable washers in the market. Manufactured with hot-dip galvanizing iron base frame, the BT washer is equipped with a powerful drive motor and only one moving part. Without any failure-prone couplings and belts the yearly maintenance is reduced to one procedure, changing the brush. Patent pending.

Range Servant BT Ball Washers take a ball-friendly approach by using fresh water pre-spray and concentrated jet-rinse to ensure clean range balls without the unnecessary use of detergents. The Range Servant BT Ball Washer comes with an 800 balls standard ball feed hopper.

- Jam proof!
- No track system
- Fresh water pre-spray and rinse
- Powerful drive motors
- Fully galvanized
- 100% of brush used
- Direct drive design

BT-1950

The BT-1950 is intended for high volume ranges with a washing capacity of 26 000 balls per hour.

BT-1300

The Range Servant BT-1300 is aimed for medium size ranges with a washing capacity of 14 000 balls per hour.

Both BT Washers can work as a stand alone unit, be fed by the Soaker 4000 or be a part of a Ball Management System. If extra capacity is required a 3 000 capacity XL-Hopper is available.

BALL WASHERS AND PRE-SOAKER

WGM 0000	Ball Washer BT-1300	14 000 balls/h
220 000	Ball Washer BT-1950	26 000 balls/h
221 400	XL-Hopper	3 000 balls
WIM 0004	Soaker 4000	4 000 balls
WIM 0060	Soaker Loading Tray	

Elevator

The RS Elevator is available in four standard lengths and can also be customized. Carrying 30 000 balls every hour, the RS Elevator can be seen at the busiest ranges all over the world.

It is constructed of rust-proof aluminum and stainless steel. With no failure prone bearings or couplings maintenance is negligible. All standard elevators comes with an automatic overfill protection system.

- 500+ balls per minute
- Aluminum and stainless construction
- Direct Drive Motor
- Custom built on request
- Automatic Overfill Protection

ELEVATOR WITH OVERFILL PROTECTOR

EGM 0001 Elevator 1.4 m (For RS Ultima 8)

410 000 Elevator 1.8 m (For RS 8/11 and flat hopper)

EHM 0001 Elevator 2.1 m (For all ball dispensers with cone top)

420 000 Elevator 2.3 m (For all hoppers with cone top)

Pre-Soaker

Designed with mud season in mind, our pre-soaker loosens deeply embedded and caked-on dirt before the balls are lifted by the elevator into the BT-1950 or BT-1300 ball washer.

- Rust proof stainless and aluminum elevator for years of rust-free functionality
- Perforated belt design keeps water in the bin and the balls on the belt
- Speed control belt drive adjustable to feed any ball washer
- Removable interior grid system allows for easy maintenance and cleaning
- Durable Polymer, 4 000 ball capacity bin

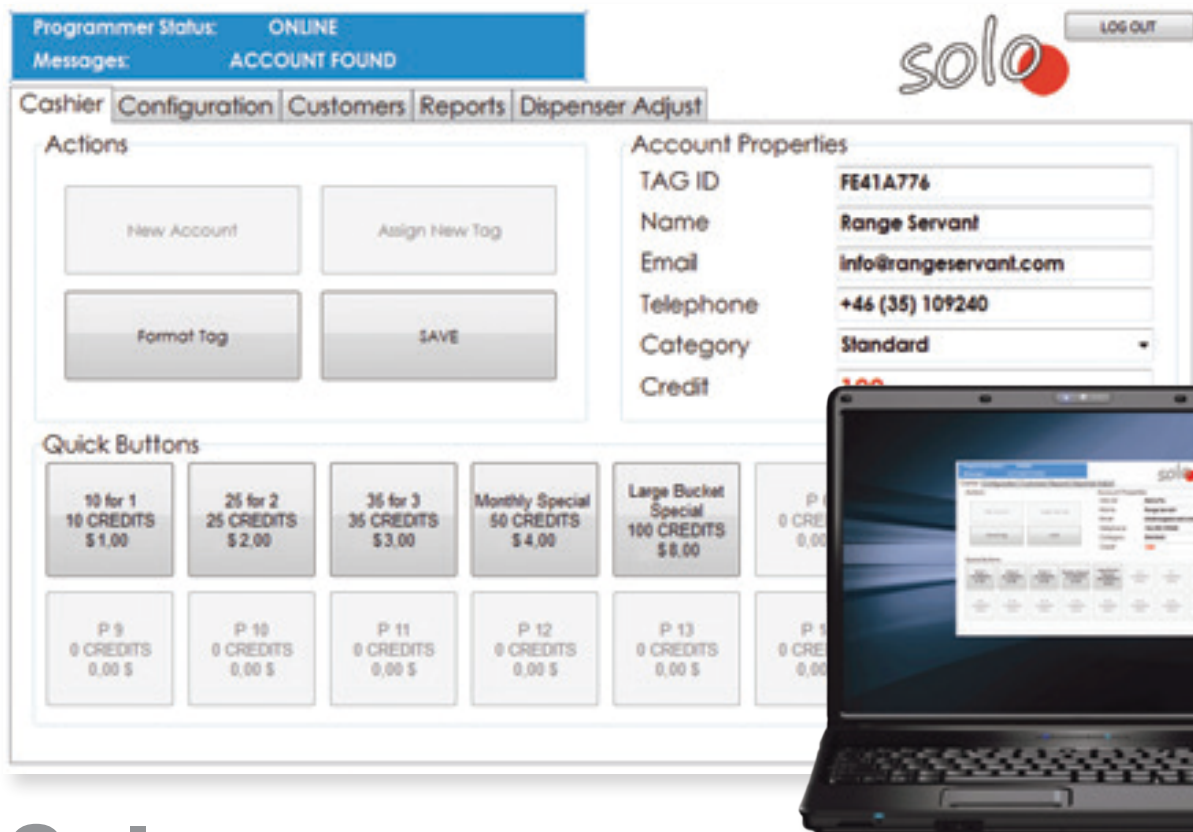

BALL CLEANER SOLUTION

Green Clean, our low-sudsing, environmentally friendly ball cleaning solution will give your range balls that extra shine.

Select Lite System^{with Touch Screen}

NEW PAYMENT SOLUTION FOR NEW AND EXISTING RANGE SERVANT DISPENSERS

- ✓ **BARCODE**
- ✓ **THE MIFARE® CONTACTLESS RFID PAYMENT SYSTEM**

LATEST TOUCH SCREEN TECHNOLOGY

Upgrade your existing RS and Ultima ball dispensers right now with Range Servant's latest touch screen technology. Customers love our Lite daylight readable touch screen with extra large icons on an 8.4" touch screen. For operators, the Select Lite package comes with the Remote Service package, the Select software, visual status reports on the condition of the dispenser and different languages.

BARCODE PAYMENT AND CARD READING SYSTEM

Installing Select Lite means your ball dispenser will have the new Range Servant Barcode Payment and card reading system, so there's no need for reading small code on

the receipts, no need for customers to punch in codes, and no risk of their getting the code wrong! No keypad means no moving parts, so you get great reliability. The receipts can be configured for any number of balls.

THE MIFARE® CONTACTLESS RFID SYSTEM

Select Lite also comes with the market-leading Mifare proximity card reader, and that means you can set up customer loyalty programmes using unique proximity cards that can't be copied, and which can function in any environment. And proximity cards are far more reliable than other payment systems.

Payment Systems

The Range Servant ball dispensers can be equipped with various types of payment systems:

SOLO

Solo is the latest payment system for all ball dispensers. Using the most advanced contactless tag technology for trouble free and durable operation. The multi-language administration software is both simple to use and rich in functionality offering total control over pricing and account information.

BARCODE PAYMENT

The new barcode payment system replaces the old pin number system. This familiar concept of the barcode offers many advantages, such as no code entering is required. The ticket can be configured for any number of balls.

MIFARE® RFID PAYMENT

The most widely used RFID technology in the world is now the standard for Range Servant Select Control System users! The Mifare® cards are unique and cannot be copied. With contactless technology it can operate in any environment. This payment system offers countless design options including key rings, wrist bands, cards and tokens.

CREDIT CARD PAYMENT

The Visa/Mastercard solution is a direct response to customer requests and offers several great advantages. With the very latest Chip and PIN technology we can offer the greatest possible security. The robust construction is applicable for outdoor use. With this solution the transaction processing is immediate and it offers a membership top-up facility.

TOKENS

Range Servant has a large selection of tokens for use in mechanical and electronic token acceptors. The tokens are nickelplated but also available in brass. Tokens are supplied in box of 500 tokens. All tokens are manufactured by Range Servant.

COINS

Up to six different coins can be used with the electronic coin acceptor. A simple mechanical coin acceptor is also available designed to accept one specific coin or token.

BILL ACCEPTORS

Range Servant can offer a highly reliable bill acceptor, which allow up to four different bank notes. The bill acceptor admits the bills in all four directions making it easy for the customer to insert the bills.

DIGICARDS

This card system uses magnetic encoded paper cards with up to 20 credits. The cards are marked after each use and scraped after all credits have been used. The cards can be customized with logos or other relevant information.

E-RANGE

e-range is a highly reliable chip-based debit key system. The e-range system comes with a reader for the ball dispenser and a computer reload software. The e-keys come in a variety of colours.

COINCODE

CoinCode is a complete solution for easy payment and access with any mobile phone. It requires no staffing and no connection to Internet for the terminal. Seems unlikely? To pay and unlock we use a unique technique called mTAC (Mobile Temporary Access Code). You can compare it with Internet Bank code generator but we do it vice versa. The coin code app offers the option to pay the Green Fee.

► Rental Trolleys

RENTAL I

A budget friendly rental model for all golf courses.

It is manufactured with rugged steel construction and is very sturdy. The classic grip handle is removable which ensures secure and space efficient storage when the trolleys are not in use. As options it can be equipped with a front wheel, advertising sign and a storage basket. The advertising option delivers an opportunity to cut costs when upgrading your rental fleet.

RENTAL 1

RENTAL II

Our deluxe rental model with a foldable third wheel.

An optional advertising sign and storage basket are available. The soft grip is easy to take off and offers unmatched comfort on the course. Adjustable bag brackets deliver a perfect fit for all bag sizes. The advertising option delivers an opportunity to cut costs when upgrading your rental fleet.

RENTAL 2

RENTAL PRO

The latest innovation of the Big Max Europe rental trolley family is the new 3-wheel Pro Trolley.

Its removable axle is protected with neoprene, which preserves the trolley's optimal condition during its storage at the pro shop. Increased stability and the new foot brake will deliver unmatched comfort and service to your guests.

The Rental PRO is the perfect choice for premier golf courses, that offer more than just a standard experience. The advertising option delivers an opportunity to cut cost when upgrading the rental fleet.

RENTAL PRO

▶ SNAG Products

SNAG® OVERVIEW

The concept of creating an easier way to learn golf rather than using traditional equipment, came about when two ex-USPGA tour players got together and agreed to create this range of products. All of the attributes and details of conventional golf have been taken into consideration and included in the design of the whole product range. This was then linked to some remarkable training tools and the results were dramatic.

Golf was easy to learn and playing SNAG® was great fun for everyone. Now these products are available around the world introducing more new players to the game. It is the chosen 'first-touch' equipment for the Tennigolf™ series of teaching programmes.

The "First Touch" equipment is fun, brightly coloured and easy to use. It can be used by children as young as 4, and similarly advancing years have no barriers. It is a fabulous teaching and learning tool and definitely not a toy. SNAG is an innovative "First Touch" product designed to promote golf at a beginner level through complete development by providing highly enjoyable and easily accessible equipment.

ACCREDITED COACHING KIT

- Launchers (Right hand) x 12 Launchers (Left hand) x 2
- Rollers x 8 SNAG balls (1) x 100
- Launch Pad (inc.3 tees) x 12 Bullseye Target x 2
- Flagsticky x 4 Rollerama Target x 4
- SNAGazoo x 4 Hoop Clocks x 16
- SNAG-o-matic x 4 Roller Brush x 4
- Snapper x 4 Equipment Carrier x 1

LAUNCHER™

The Launcher™ is designed in conjunction with the Launch Pad™ for use in executing the chip, pitch and full swing. It has a specially designed five-sided Right On Red® grip that helps the new learner form their hands correctly every time.

The top two panels of the grip have yellow and red dots that when used with the appropriate word cues, assist in correct placement of the hands. It has an oversized head with a bullseye target in the center of the face and is developmentally appropriate in both length and weight.

The Launchers come in three sizes, 26" (green) for 4-7 yr. olds, 30" (blue) for 8-10 yr. olds and 34" (red) for 11+.

ROLLER™

The Roller™ is designed to work like a putter in golf. Its design allows it to be used either right or left handed. It has a specially designed five-sided Right on Red™ grip that helps the new learner hold the club properly in their palms instead of their fingers.

The Rollers™ come in three sizes, 8m (green) for 4-7 yr. olds, 9m (blue) for 8-10 yr. olds and 10m (red) for 11+.

▶ SNAG Products

BULLSEYE TARGET™

The Bullseye Target™ is used primarily for the pitch shot. It has red and white alternating rings that have numerical values. It also has an inflatable inner tube that fits securely into the cover.

This is a great target to put up in your office and garden to pitch balls to develop your touch.

FLAGSTICKY™

The Flagsticky™ target is designed to act like the hole in golf. Instead of being a hole in the ground, it is an above ground yellow cylinder covered in hook material. When your SNAG Ball™ sticks to the Flagsticky™ then you have completed your hole.

The target comes with a cylinder, cap, flagpole and flag. The convenient cap is easily removed and allows the cylinder to be filled with water or sand.

ROLLERAMA™

The Rollerama™ target is used primarily in rolling and chipping. The target is three feet wide and has numerical sections including a bulls eye centre and is triangular in shape.

It folds up easily for storage. This target is great for children learning the game!

STICKY HELMET™

One of the really cool things about SNAG™ is our sense of humour. We devised sticky outerwear to make you the life of the event!

Whoever puts on the suit gets to catch balls launched from the other SNAGsters.

ONLY AVAILABLE IN LARGE.

STICKY JACKET™

One of the really cool things about SNAG™ is our sense of humour. We devised sticky outerwear to make you the life of the event!

Whoever puts on the suit gets to catch balls launched from the other SNAGsters.

Get around a group of kids and they'll toss them at you as well.

ONLY AVAILABLE IN LARGE.

STICKY PANTS™

One of the really cool things about SNAG™ is our sense of humour. We devised sticky outerwear to make you the life of the event!

Whoever puts on the suit gets to catch balls launched from the other SNAGsters.

Get around a group of kids and they'll toss them at you as well.

ONLY AVAILABLE IN LARGE.

Signs, Seats and Shelters

1. TEE-SIGNS

Tee-signs are manufactured per your requirements. Old signs are exchanged with new signs in seconds. Lacquered ball and plastic lid available as options.

2. INFORMATION BOARD

Signboard is available in different sizes, with pole and wall mount as options. The show-case is locked by key and made of celar anodized aluminium with front glass of UV-resistant polycarbonate.

3. SEATING

A maintenance-free golf seat durable to be left outside throughout the year! The seat and back are made of aluminium sections with wood appearance.

4. CLOCK COLUMN

Illuminated clock controlled by timer signal = always the right time. Logotype or advertising slogan can be added and 360 degree seating option is available.

5. DRIVING RANGE SHELTER

This bright and spacious weather-proof area provides a great setting for instruction. The roof consists of UV-resistant polycarbonate sheets and the walls are made of safety glass. There are options like tinted glass, lighting and seating.

6. SAFETY NETS

The net is made of powder-coated expanded metal. A modular system makes it easy to assemble per your sites' layout requirements.

7. FENCE WITH CHAINS

Delimitations with poles and hot dipped galvanized chains offer a simple, sturdy and easy to mount fence.

8. COMBINE THE PRODUCTS

The products can be combined and assembled based on your requirements. Mounting is simple with pre-fabricated plinths or concrete slab. All products are made in sturdy and durable constructions that are easy to maintain.

THE TEE-SIGNS, INFORMATION BOARDS, CLOCK AND SHELTER HAVE SPACE FOR ADVERTISING.

THORNLEIGH GOLF CENTRE

Range Servant Automated tee ups have been a huge talking point amongst golfers in Sydney since being installed at our new Thornleigh Golf Centre.

We have new customers travel from over an hour away, and when we ask them "How did you hear about our range?" they reply "We heard you had automated tees".

We have 20 Range Servant Automated tees at our 56 bay all undercover range and at least 85% of balls hit are at the automated bays.

In retail terms we sell more drivers than anything else, because it's just so easy to just keep hitting drivers at the same height every six seconds.

As a golf professional I am not very mechanically minded, and I didn't want a system where you were constantly repairing the tee ups.

Range Servant's automated tee ups are simple in design, very well made and with not too many moving parts.

Steve Aisbett

General Manager, AAA member PGA

PGA OF SWEDEN NATIONAL

"For us was Range Servant the best choice as a partner as we strive to establish the highest quality practice and driving range facilities alongside our two 18 holes courses. We choose Range Servant due to their high quality products and their first class service."

Ove Sellberg

CEO

PGA of Sweden National

STARTING NEW AT GOLF

"Range Servant is the World's leading golf ball management systems provider and synonymous for innovation in the industry. SNAG Europe and i-KAN GC.com have had a fantastic working partnership with the Range Servant team for several years and could not have identified a better partner for introducing the unique Starting New At Golf (SNAG) equipment to Sweden. Our companies share so many ideals the partnership provides true added value for all concerned. We are excited to see SNAG grow and be associated with such a respected brand with a strong network."
