 BOGOGNO GOLF
RESORT – ITALY

The global pandemic of COVID-19 has affected all of us in many different ways. Golf, however, was one of a few bright spots. As an outdoor activity that could be played with minimal contact with others golf was an early escape from the daily Coronavirus discussions. I'm proud of the innovation and perseverance Standard's employee-owners displayed during 2020 and how superintendents were able to adapt to the challenges to remain open for play and provide the escape we all needed. Whatever 2021 throws at Golf, be assured Standard is positioned to once again provide new and innovative products to support golf course superintendents as they maintain their course and driving range.

INTRODUCING MAGNATECH™

– a proprietary aluminum blend from Standard Golf. Beginning in 2020, all of Standard Golf's aluminum cups will be made with our new MagnaTech™ Aluminum Blend. A proprietary blend with more silicone and less copper, our MagnaTech™ Aluminum is stronger than previous versions and has less corrosive tendencies.

Standard Golf's ST2000 Smart-Fit™ Cups come with three configurations: aluminum, plastic and "hybrid" with an aluminum base and plastic molded walls to combine the best of our aluminum and plastic models.

All of our notched ferrule flagsticks - Royaline (*now with veil wrapped coating*), Tournament and Putt-Saver - fall right into place every time without twisting, sticking or sinking.

400 DENIER VS. 200 DENIER FLAG FACTS:

FACT #1

Sometimes less is more. 400 denier is relatively new to the industry and typically used on sailboats.

FACT #2

The purpose of a golf flag is to show where the cup is and to help golfers judge wind speed. It takes a 7 to 10 mph wind to get a 400 denier flag waving. It takes a 3 to 5 mph wind to get a 200 denier flag waving. Advantage: 200 denier. Plus, the heavier 400 denier flag wears out ferrules flagsticks and cups quicker.

FACT #3

Golf flags are meant to fly. Sails are meant to propel sailboats. One has nothing to do with the other. So trust us when we tell you the only time we recommend 400 denier is usually when we're talking to sailors, not superintendents.

All nylon flags are made of DuPont SolarMax® Nylon!

PUTT-SAVER TOURNAMENT FLAGSTICK

The Putt-Saver is a one of a kind golf flagstick. Not only is the flagstick two-pieces to help reduce shipping surcharges, but the diameter of the stick at the bottom is the narrowest in the game of golf. This allows more room for the ball to fall into the cup.

A direct hit to the flagstick gives the ball more cup coverage to fall into, as well as more room for an off-center putt to catch the cup and fall - as opposed to deflecting off the flagstick and not falling.

TIP: Standard Golf recommends inside sharpened cutting blades primarily for sand based greens. They pack the sand tighter and hold it more firmly in place. Trouble disengaging plugs? Spend just a few minutes sanding the inside of the blade with emery paper. You'll be amazed at how much easier it is to unplug.
